Long list of contents!

Overall introduction to the report ... 5
Bothnian Sea as a test area for transboundary MSP: a rationale ... 5
The Bothnian Sea: an introduction ... 6
General description and delineation ... 6
The Bothnian Sea: physical aspects ... 8
Sediments ... 8
Land lift [TO BE INSERTED] ... 9
Coastal and archipelago types ... 9
Land relief, depth relief and rivers ... 10
Water circulation ... 11
Salinity ... 12
Ice winters ... 13
The Bothnian Sea: Environmental aspects ... 14
Climate and climate change [TO BE INSERTED] ... 14
Eutrophication – HELCOM assessment [WFD to be inserted] ... 14
Chemical status – HELCOM assessment [WFD to be inserted] ... 15
Nitrogen pollution load from land ... 16
Internationally important bird areas (IBAs) ... 17
Existing nature protected areas ... 18
Shores sensitive to oil spills ... 19
Fish spawning grounds ... 20
The Bothnian Sea: humans at sea ... 30
Shipping intensity, ports and IMO routeing ... 30
Ports: Finland ... 32
Ports: Sweden ... 32
Accident risk areas ... 33
Fairways ... 36
Leisure boating ... 38
Wind parks (planned and existing) ... 38
Dredging (including gravel and mineral extraction) and dumping ... 42
Military use ... 43
Scientific monitoring sites ... 44
Archaeology and cultural heritage ... 45
The Bothnian Sea: humans on land ... 48
Land Cover ... 48
Settlements and urban structure ... 50
Population and present human demographics in the region ... 51
Population change ... 51
Gender balance and dependency ... 53
Swedish and finnish language in Finland ... 55
Regional aspects of economic activities – GDP per capita ... 57
Employment ... 57
Energy & communications ... 60
Leisure dwellings ... 62
Coastal tourism on land ... 64
Existing plans and strategies ... 66
Regional plans in Sweden ... 66
Other strategies, plans and projects ... 66
The Bothnian Sea interactions: synthesis and analysis [TO BE SUBMITTED LATER] ... 69

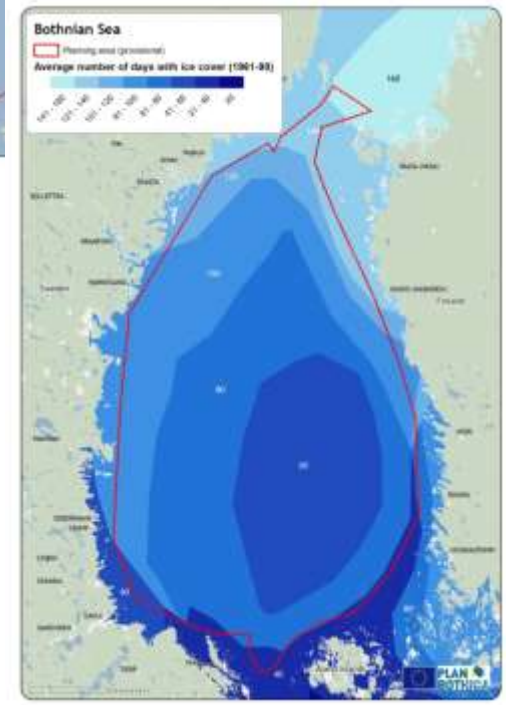

Number of maps in each chapter

Physical aspects

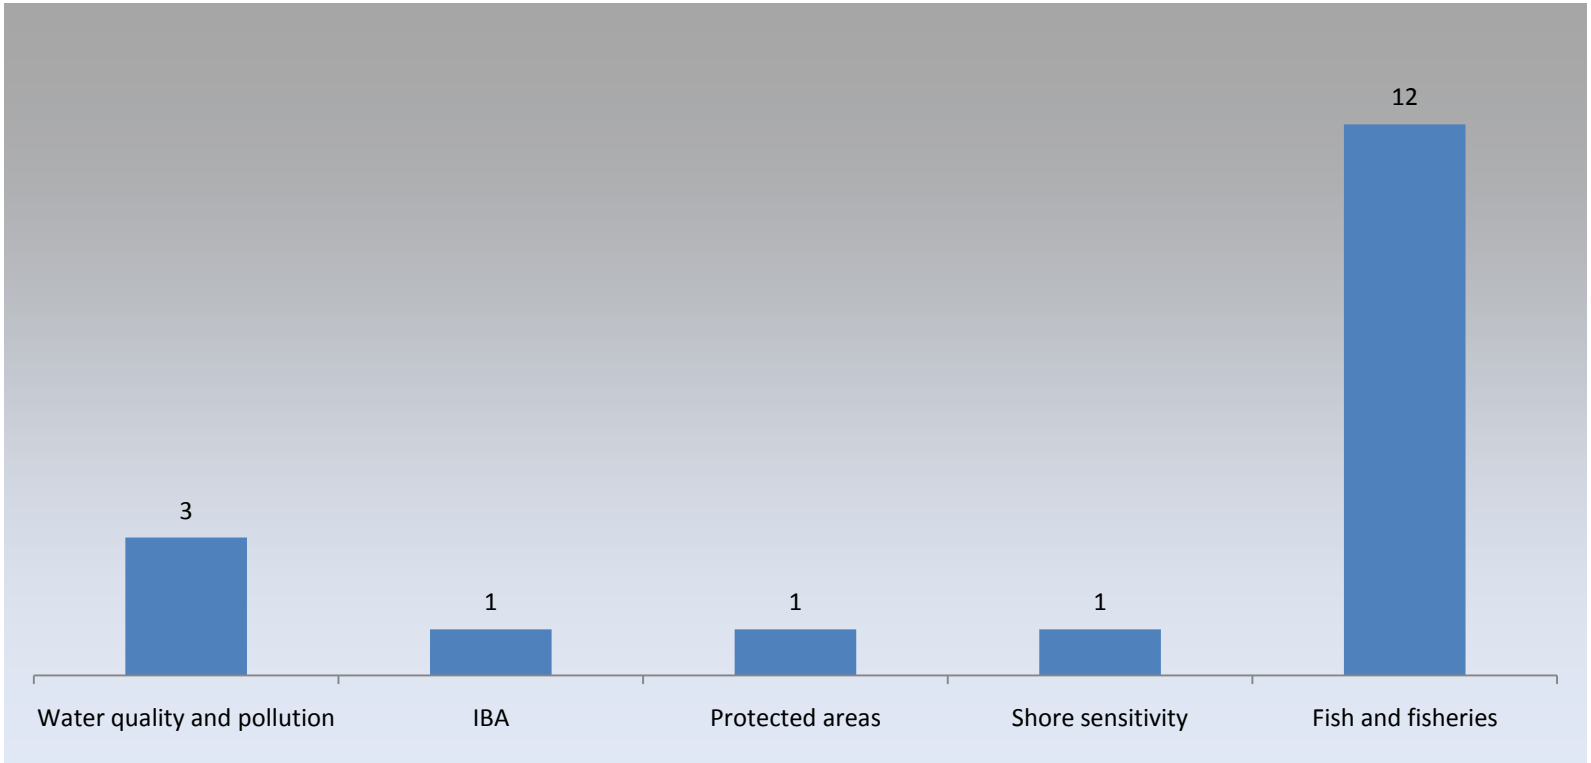

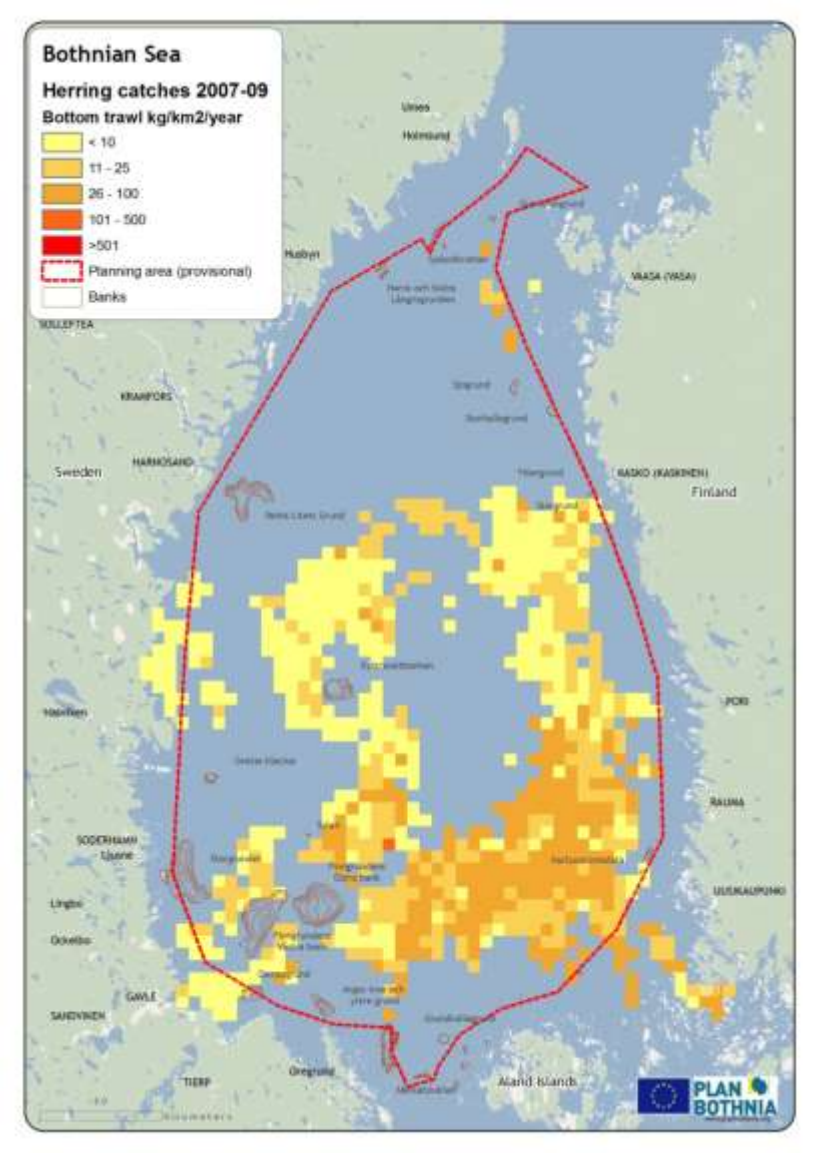

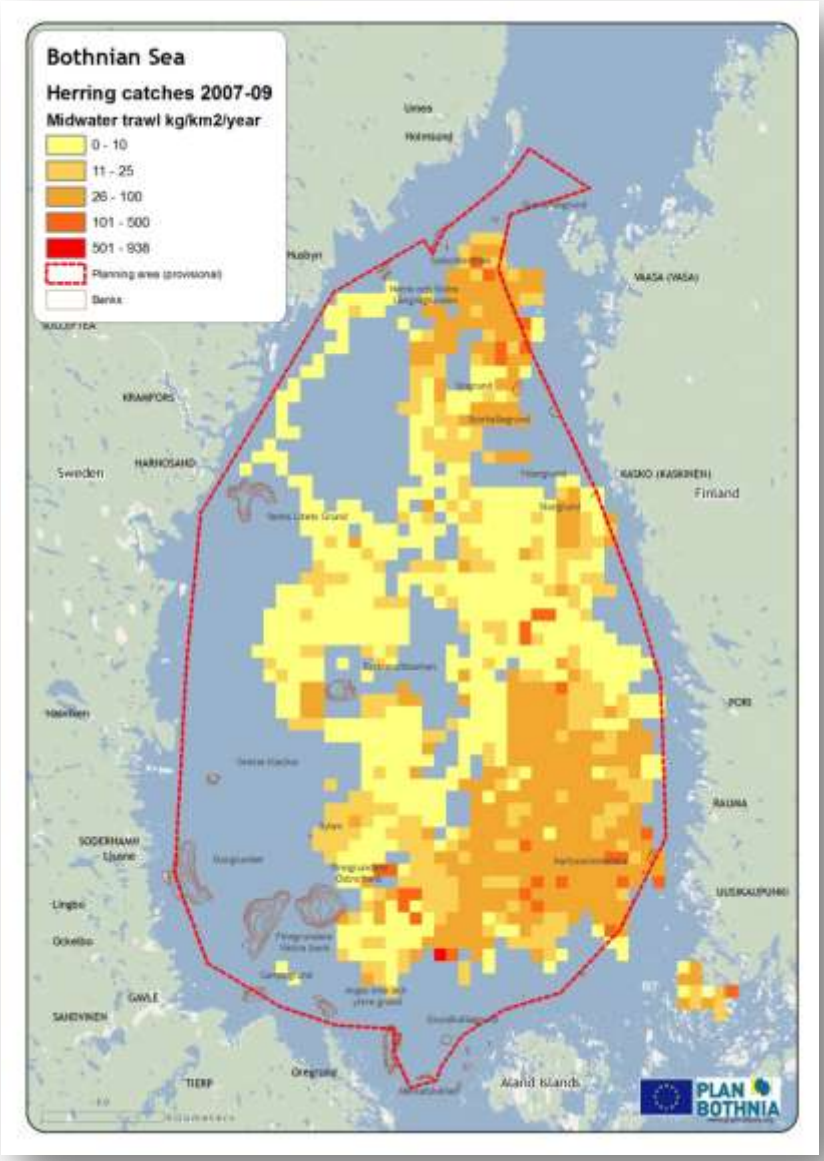

Environmental aspects

Number of maps

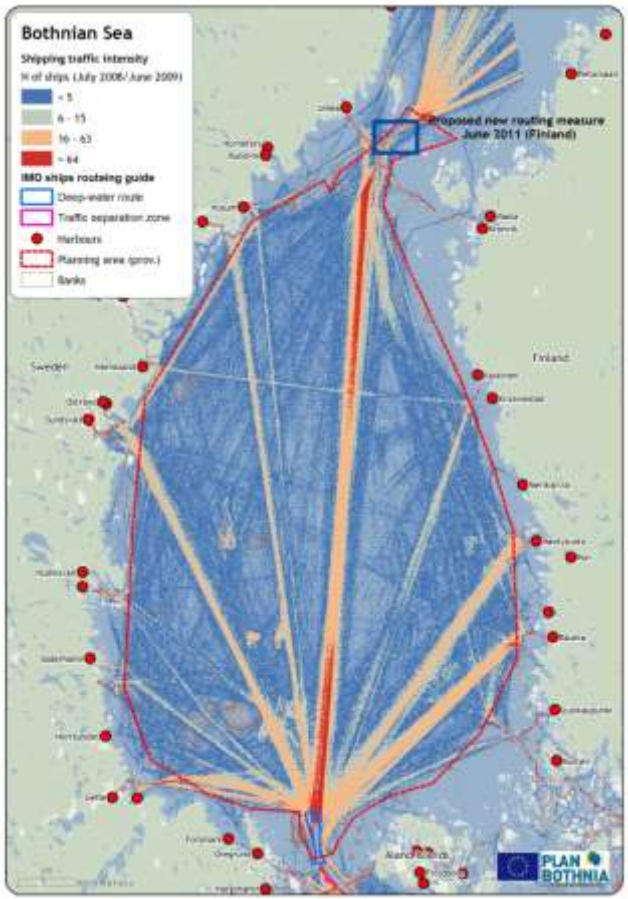

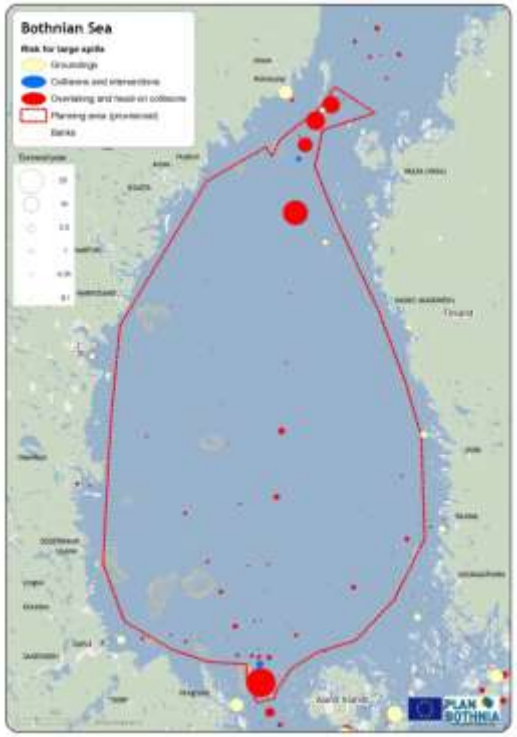

Environmental aspects

Humans at sea

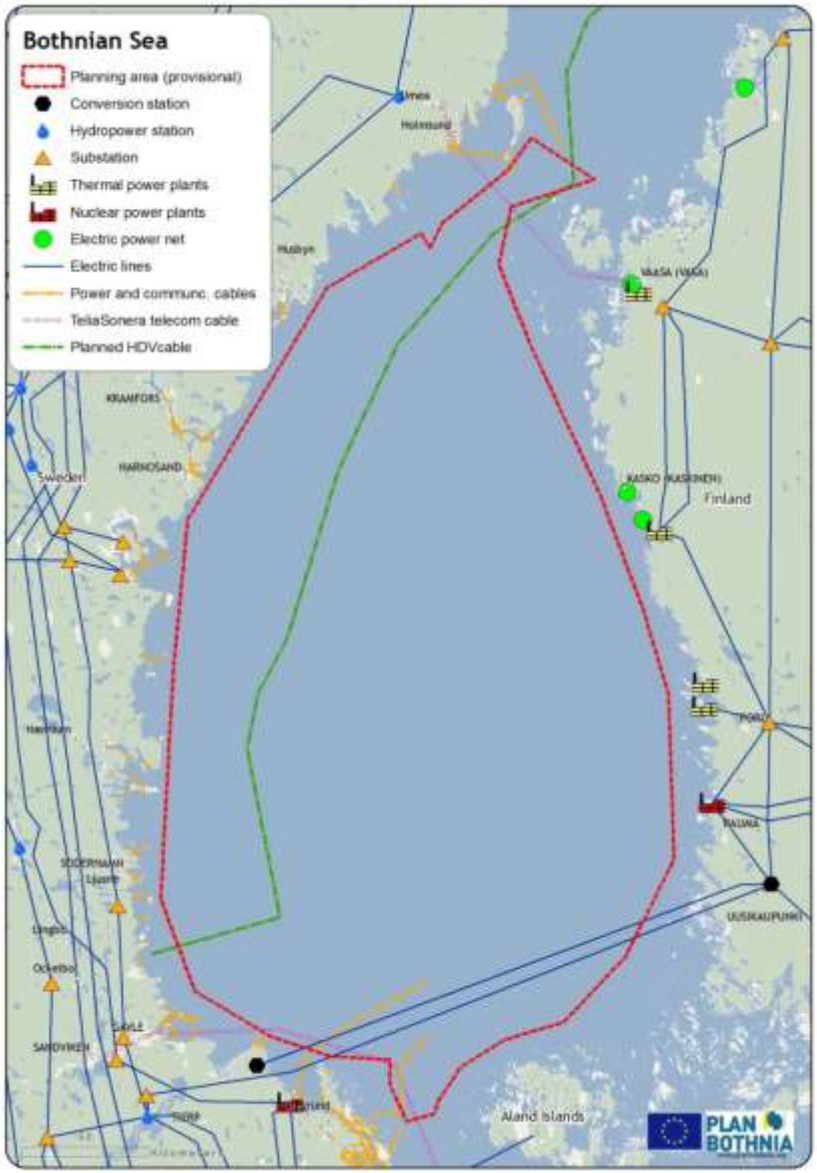

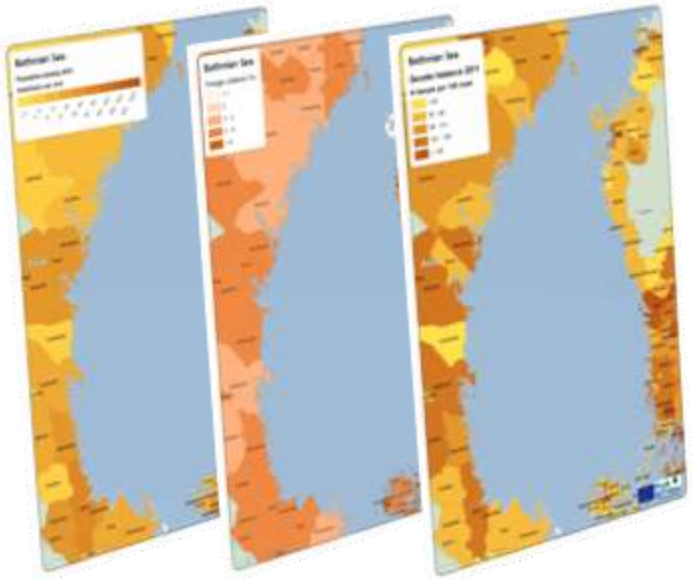

Humans on land

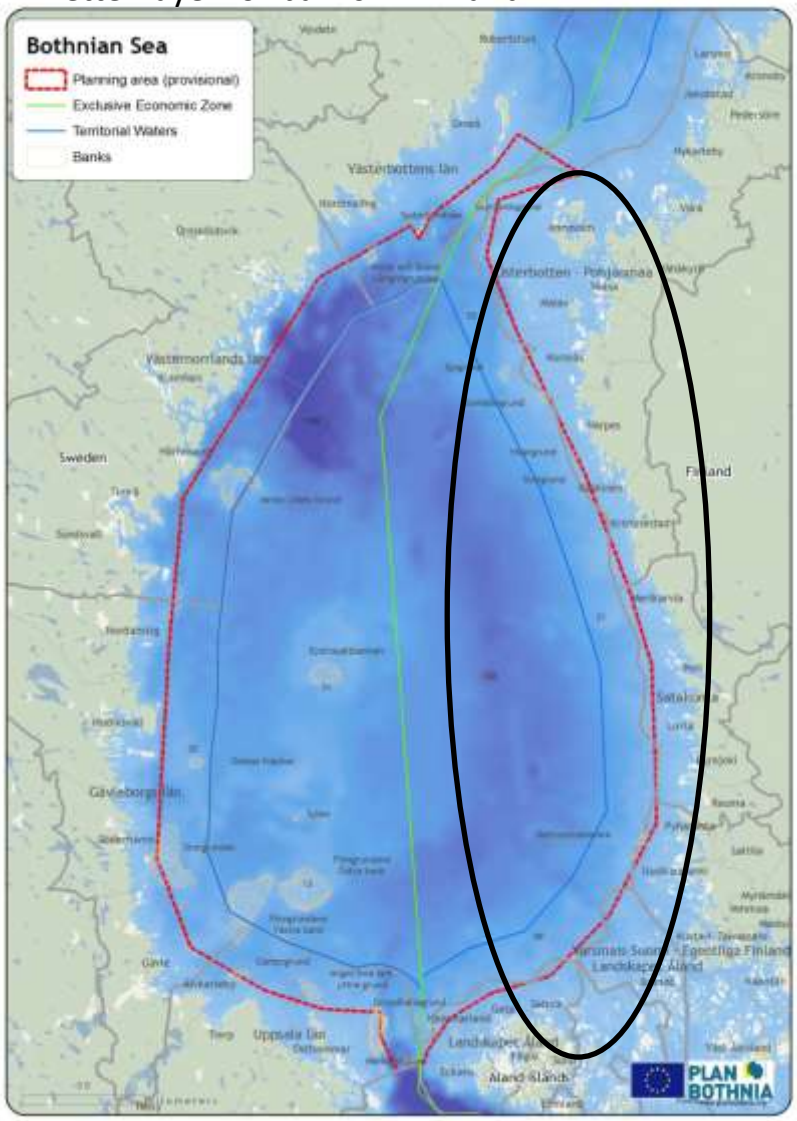

What's missing?

Better layer for banks in Finland

Water quality according to WFD

More environmental data?

Something else?

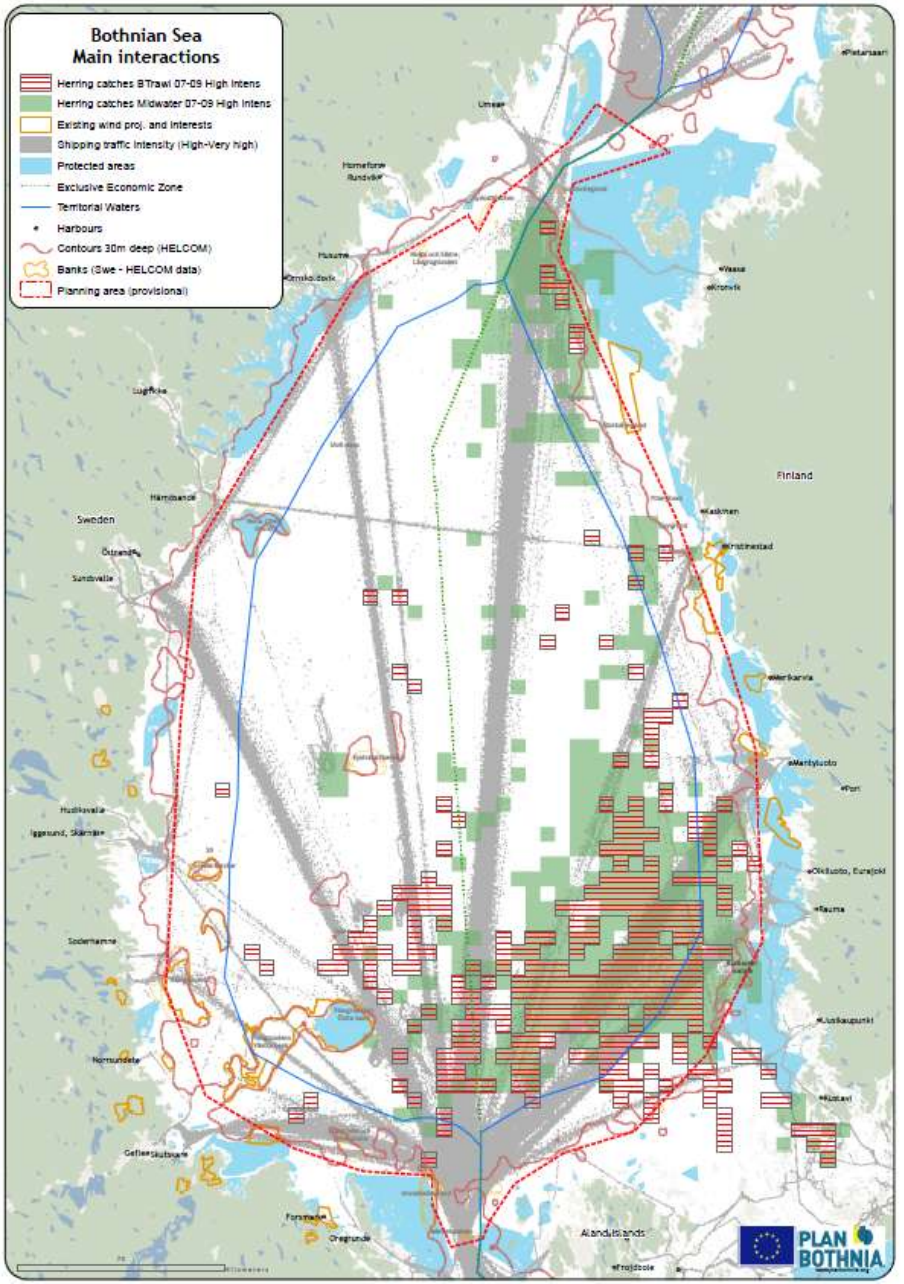

Let’s start the analysis

Hearring catches

Wind projects and areas of interest

Protected areas

Shipping traffic

Places with three overlapped features
